

NOTES

1. A HELICAL TIE CAN BE USED AT ANY POSITION TO ADD STRENGTH TO THE WALL, ESPECIALLY WHEN USING RANDOM STONEMWORK. ALWAYS ENSURE THAT THE HELICAL TIE IS DRILLED THROUGH THE FACE OF THE SURECAV SHEET AND NOT THROUGH THE PODS. DRILL CORECT SIZE PILOT HOLE FOR CONCRETE BLOCKS.
2. HELICAL TIES ARE ALSO SUITABLE FOR USE WITH TIMBER FRAME CONSTRUCTION.

SURECAV WITH HELICAL TIE

IMPORTANT: INSERT HELICAL TIES THROUGH FLAT FACE OF SHEET

TITLE

SURECAV WITH HELICAL TIE TO SUPPLEMENT USE OF NORMAL WALL TIES
