

SURECAV SHEET SHOWING CUT-OUT AREA

NOTES

Trim the sheet as close as possible the bridging piece of the cavity tray to maintain a moisture free cavity.

In some cases, cutting through a pod will be unavoidable but there is still protection given by the bridging piece at the back of the cavity tray.

SURECAV50  
(ALSO APPLIES TO SURECAV25)

TITLE

TRIM SURECAV50 TO CAVITY-TRAY BRIDGING-PIECE
